LANGUAGES

- Bahasa
- English

PROFILE

Hi, I'm Wahyu, I am an Information Systems Student at Ganesha University of Education. I am interested in data, how to process data, and others. I see that data will always be used in all organizations anytime and anywhere. As a Data Science enthusiast, I am more interested in the python programming language because this language is not only simpler, but can also process various types of data easily. My interest in Data Science drives me to always be able to analyze all case studies, creating a better, concrete conclusion.
